## NEWS

In this issue, thanks to Wilf Whitehouse and Dave Cooper, we list the known Nixdorf postage labels to September 1991. Canad Post is increasing the use of this equipment and the list is getting quite long. To conserve space for other material the subsequent listings will only be the reported changes in the list from N3000000 to N3000349, and listings with a higher number. We want to keep on top of this so if anyone has information regarding the system operation and Canada Post guidelines for their use, or new numbers, please share it with us.

Our friends in the Meter Stamp Society have included Canadian material in recent auction sales. I give a listing of these items, some are very interesting.

Ed Lapham always send me new material after every Newsletter, which I appreciate very much. I am ashamed I am so far behind in publishing what was sent in. The next page has quite a few new items to add to our catalogue.

I have a lot of miscellaneous material that you kind people have sent in to add to our catalogue, or just of interest. I list this now.

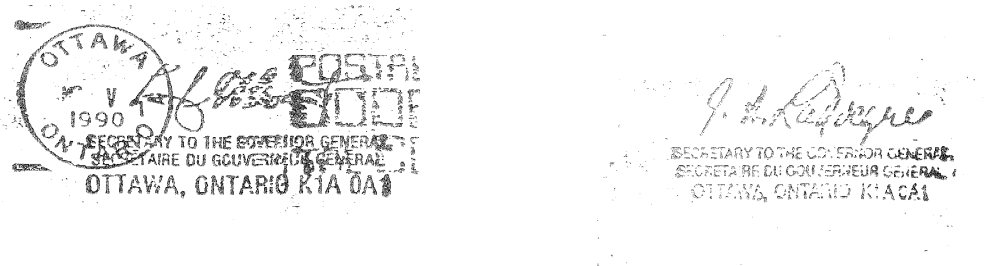

A friend collects Christmas themes and asked for my opinion on the item below. She has two covers and the red imprint appears to be a continuation of the indicia; however there is almost one-half inch extra space between it and the ad. The question - is the ad pre-printed, or is this a modified meter? The print wheel would have to be of larger diameter. Any ideas?

I have been working through a quantity of tapes that I acquired a few years ago. These were all soaked off covers. While they are of little value I am really concerned that the imprints are almost unreadable in some instances. The new meters with adhesive backed tape are particularly bad. Check your collection and see if age is affecting it.

Another non-member friend has been bitten by the Nixdorf bug and writes about his trip to the west. "In Regina I learned that all printers in one RPO have the same serial number. The "accounting" for all keyboard printer stations at one RPO is done at a single station." He was intrigued at Whitehorse "Mail\*Poste has succeeded in Whitehorse. There, on the outskirts of the city, they have a Letter Processing Plant with no public access. On Main Street, in a book store, there is an RPO with 3 Nixdorf printers. Five blocks away in a greeting card shop is another RPO with one printer." The Chamber of Commerce map shows another in a subdivision but when he went there they were just beginning to build the store. Yellowknife has no RPO, just an old fashioned main street post office. He also noted that "YK", probably akin to Alaska "AK" is used instead of "YT".

Clayton Rubec noted the Office of the Governor General had always used hand stamps but enclosed the item below to show that this imprint should probably be classed with the House of Commons and Senate meters. I also received one and show it as well, with a different signature.

The Editor's plans exceeded the available space so Ed's contributions I have referred to will have to wait until the next issue. Sorry, but keep writing.

On the Type 19 inventory can you locate higher numbers than 100838, and 401060?

MSS Bulletin 212 illustrated the Pitney Bowes 3.4 (M699) with the inverted town and datemark. It was on piece and in the above auction sale. The date is 21XI'35. This is not listed in our CMSG Catalogue. Wilf Whitehouse was fortunate to locate one on full cover dated 19XII'35 and sent it in earlier this year. Wilf's cover is shown below. The error was created by the J.S. Mitchell Co., Sherbrooke, Quebec, and appears to have been used for at least a month or more.

The history of the Postalia Company was set out in Newsletter 29. In this issue I include the CMSG catalogue regarding this meter. I am certain it is incomplete so have a look through your material for added items. Send me a clear photocopy.

Ross Irwin collects the following type of material should you have any to exchange. Notice the covers show a Canadian Embassy or Trade Office in a foreign country used as a "slogan" return address with a meter stamp. In the right place these would be common, I find them hard to find. It is an interesting group.

Wilf Whitehouse also sent the nice piece below. Type 9.3 (94081) dated JAN16'40 was mailed to Osaka Japan. It cleared PASSED FOR EXPORT at Toronto Postal Station F on January 18 where for some reason it was EXAMINED BY CENSOR, even though there was no war with Japan. I also wonder who applied the Japanese label to the cover. The cover bears the OSAKA date stamp of 22.3.40 and they probably applied the Return/Unknown stamp. It arrived back in Canada at the Dead Letter Office on April 10, 1940, away a total of 83 days.
